

escape® P6 Air

Designed for maximum multi-room flexibility

The Escape® P6 Air is based on the P6 BT platform but thanks to AirPlay 2, Chromecast built-in and Roon it offers the possibility to wirelessly stream music via an existing WIFI network to multiple speakers without the limitations of a single brand.

Like the P6 BT, this audiophile portable speaker is still most notable for its subtle beauty, discreetly adding style and color to your interior and far beyond.
