

IsoTek® | PERFORMANCE

MAXIMISE YOUR ENTERTAINMENT

Without mains power, no audio or audio-visual component can function. Your musical enjoyment is reduced by mains noise contamination – this can be from either Differential or Common Mode mains noise. Differential noise is created by the power supplies in all electronic devices, while Common Mode noise is introduced by RFI and the wireless communications that are becoming increasingly common.

With the Performance range you will hear significantly better sound quality, with more detail and greater dynamic range. All of your components will be improved and protected, allowing you to realise the best possible performance whenever you listen.

EV03 AQUARIUS

One of the most cost-effective upgrades you can buy for any high-quality audio system, Aquarius is a multi award-winning six-way mains conditioner that redefined the power cleaning market. Two high-current outlets are provided for amplifiers, subwoofers and so on, with four medium-current sockets for other components.

- Removes Common Mode and Differential Mode mains noise.
- RFI Reduction 60dB.
- Six unique conditioning stages ensure optimal isolation between all outlets, eliminating Differential Mode cross-contamination.
- KERF® (Kirchoff's Equal Resistance Path) ensures equal resistance and equal power delivery to all outlets. No outlet gets power before the next, a common problem with other power products which daisy chain outlets together.
- 67,500A of instantaneous protection, featuring IsoTek's unique sequential protection system.
- Internal wiring; solid core silver plated OFC copper with FEP and virtual air dielectric technology.
- Two high-current outlets delivering 3,680W continuous power. Four medium-current outlets delivering 1,150W continuous power.
- Available in UK, EU, US, AU, CH and ZA sockets.
- Supplied with IsoTek EV03 Premier power cable.

"The lift in performance is quite remarkable."
