

IsoTek® | PERFORMANCE

MAXIMISE YOUR ENTERTAINMENT

Without mains power, no audio or audio-visual component can function. Your musical enjoyment is reduced by mains noise contamination – this can be from either Differential or Common Mode mains noise. Differential noise is created by the power supplies in all electronic devices, while Common Mode noise is introduced by RFI and the wireless communications that are becoming increasingly common.

With the Performance range you will hear significantly better sound quality, with more detail and greater dynamic range. All of your components will be improved and protected, allowing you to realise the best possible performance whenever you listen.

YOUR SYSTEM VALUE

£3,000 - £12,500

EV03 SIRIUS

Hi Fi World
5 Globe Winner

Sirius is a high-performance, multi-award-winning power bar, which protects and improves your precious audio components. A special wall bracket system allows Sirius to be mounted discretely behind your audio system.

- Removes Common Mode and Differential Mode mains noise.
- RFI reduction 40dB.
- Independent outlets – no outlets are connected together, stopping Differential Mode mains noise cross-contamination.
- Unique Inductive Resistance Gate® optimises the isolation between each of the six outlets.
- KERP® (Kirchoff's Equal Resistance Path) ensures equal resistance and equal power delivery to all outlets. No outlet gets power before the next, a common

problem with other power products which daisy chain outlets together.

- 22,500A of instantaneous protection, featuring IsoTek's unique sequential protection system.
- Internal wiring; multi-strand silver plated OFC copper with PTFE dielectric.
- Maximum power, continuous 2,300W.
- Available in UK, EU, US, AU, CH and ZA sockets.

“A distinct lift in overall musical performance.”

TECH RADAR

“Excellent value for money... A great real-world product that is useful and inexpensively upgrades your system.”
