

NAD C316BEE V2 – Auto Standby Feature

(22/03/2022)

Auto Standby feature is an integral feature of the C 316BEE that conforms to European ecodesign regulations (for 230V version models only).

When Auto Standby is enabled, the C 316BEE will automatically go to standby mode if there is no audio or user interface interaction for 30 minutes.

Auto Standby can be enabled or disabled by the following button combinations and STANDBY LED display indicators.

Enable: Press and hold at the same time POWER and VIDEO button until the STANDBY LED flashes once. Auto Standby feature is activated.

Disable: Press and hold at the same time POWER and VIDEO button until the STANDBY LED flashes twice. Auto Standby feature is deactivated.
