

This small integrated amplifier offers outstanding audio quality and ultimate input flexibility with all digital and analogue input options you can dream of. Superior tube-like sound and a high-class 24bit/192kHz D/A converter stage are combined in a perfect way. Despite its small size, 9 (!) source devices can be connected simultaneously. MaiA DS2 is one of the most versatile products on the market, it offers analogue phono and line as well as digital inputs such as hifi streaming via aptX Bluetooth! Five analogue outputs leave no desire unfulfilled. MaiA DS2 can be upgraded with Power Box MaiA DS for almost double current capability. Power Box MaiA DS acts as single ultra clean power solution for up to 5 Pro-Ject products, like CD, Streamer and turntable. Control via IR remote or App makes usage a piece of a cake. The sandwich aluminum / metal casing is aesthetically pleasing and protects effectively against interferences. MaiA DS2 is available in silver or black with optional wooden side panels.

About Pro-Ject

Pro-Ject Audio Systems is known for its beautiful range of price-friendly turntables. As the largest turntable manufacturer in the world, the company has helped power the resurgence of vinyl, which is predicted to overtake CD in popularity within a few years. Pro-Ject also manufactures a range of hi-fi components.
