

ORIGINAL

QED Speaker Cables Original

Low Density Polyethylene dielectric, 99.999% Oxygen Free Copper conductors and optimised geometry all contribute to the superb sound quality of this low cost cable.

Features:

- Internationally acclaimed award winning cable design
- Cable geometry optimised for low dissipation factor and inter conductor leakage
- High performance low-density polyethylene insulation
- 99.999% Oxygen Free Copper conductors
- Genuine low impedance design make this cable ideal for long runs
- Size: 3.6 x 7.0mm

MICRO

QED Speaker Cables Micro

Entry-level speaker cable that combines convenience and performance. The miniature figure '8' construction allows Micro to be used in the most demanding placement situations

Features:

- Miniature figure '8' configuration
- High performance low-density polyethylene insulation
- 99.999% Oxygen Free Copper conductors
- Small enough to fit along skirting boards or under carpets
- Ideal for Hi-Fi, Home Theatre and room to room wiring
- Size: 2.4 x 5.0mm
