Qi65 Speaker

6.5" Professional
In-Ceiling Speaker

In-ceiling speakers for the professional installer with a 6.5" (165mm) polypropylene cone and a striking bezel and grille design that clips magnetically into place. Circular and square grille options are available to ensure the perfect match for each customer's décor. Tweeters are directable and their domes restored automatically in the event of accidental deformation during installation. All our Professional and Performance Install products feature protective driver dust covers and cloth backed grilles to facilitate painting.

Qi65ST Stereo Speaker

6.5" Professional In-Ceiling
Stereo Speaker

A single-stereo version is available for use in restricted spaces, where producing a full stereo sound field is not practical, for example in a bathroom above a shaving or make-up mirror. Each speaker has two sets of terminals, separate 'left' and 'right' tweeters and an LF/MF speaker with a dual voice-coil. Single stereo tweeters are not directable.

Qi80 Speaker

8" Professional
In-Ceiling Speaker

With an 8" (200mm) driver the Qi80C is the most powerful of the Professional in-ceiling range including the beautiful Q. Install magnetic grille design where the super slim bezel and narrow-mesh grille clips firmly into place. The major benefit of this grille design is that it makes a larger diameter in-ceiling speaker look much less obtrusive.
