Z1C

Power Adapter x1

Power Cord x1

Network Cable x1

Product Manual x1

Warranty Card x1

Front Panel

Rear Panel

① Power Button

When the power is off, press the button to turn on the power

When the power is on, long press the button to turn off the power

② Clock Input

10MHz clock Input port (BNC interface, 50 ohm impedance)

③ Clock Selector (Slide the switch only when the device is turned off)

To use external clock, slides to the side of ON and power cycle

To use internal clock, slides to the side of OFF and power cycle

④ USB Audio Output Port

USB AUDIO Ultra high resolution digital audio output

⑤ Capacity Expansion Port

USB 2.0

⑥ Network Port

Supports 1000Mbps Ethernet Network and 100Mbps Ethernet Network

⑦ Power Status Indicator

The green light is on when the power is turned on and the power input is good

When the power is off or there is no power input, there is no indicator light

⑧ DC Input

5.5mm x 2.5mm DC 12V power input (can be connected to Silent

Angel F2 or suitable 12VDC linear power supply)

⑨ Power indicator

When the power is on, the blue light comes on

When the power is off, there is no indicator

⑩ Maintenance port

Only for engineers to maintain equipment, do not use

⑪ Capacity Expansion Port

USB3.1 (USB 2.0 compatible)

Preparation Work (1)

❗ Make sure audio devices are all powered off.

Connect Z1C Network port to a Bonn series or WiFi router LAN port with an Ethernet cable.

Connect USB AUDIO port to a USB DAC with the USB cable.

Preparation Work (2)

Connect the power adaptor to the circular power inlet in the rear panel.

Connect the power adaptor to the AC outlet with power cord (Make sure the power cord has been plugged into the power adaptor before plugging into the AC outlet on the wall).

Advanced Connection Diagram

Power On

Power on Z1C by pushing the power button at the rear panel. The power LED will light on.

Power on other audio devices

Install "VitOS Manager" App on a Pad or Phone

Use below QR code to install "VitOS Manager" app on a pad or phone.

iPad / iPhone
(iOS)

Android Pad / Phone
(Google Play)

Android Pad / Phone

Use "VitOS Manager" App to Control Z1C

By using "VitOS Manager" app on a iPad/iPhone/Android Pad/Android Phone, which is connected to the same LAN, you are able to discover Z1C, install Roon Server to Z1C, view system status of Z1C, Please refer to the official website for more function instructions <http://www.silentangel.com/>.

Use Mobile Device to Control Z1C

Device Search Guide

If the device cannot be found when connecting, click the "Help" button.

Enter the "Discover Guide" interface, enter the IP address of the Z1C device in the space marked at the bottom of the interface, and then click "Connect".

The connection to Z1C is successful and the VitOS Manager main page is shown.

Install Applications

Before using the application, you need to confirm the installation status of the application. If "Running" is displayed, it means it has been installed. If "Not Installed" appears, click the corresponding application, and then click the "Install" button.

After installing the application, "Downloading" is displayed. Wait until the download is completed to "100%". If the status displays "Running", the installation is successful.

Application Introduction

- Orbiter Plugin:** Orbiter Plugin is an application plug-in that mainly builds music playback operations for VitOS devices. It is also an important program for VitOS
- HQPlayer NAA:** HQPlayer NAA (Network Audio Adapter) enables VitOS devices to act as network adapters for HQPlayer running on a PC or music server. In this case, music data processing is performed by HQPlayer, and the processed data is then streamed asynchronously over the network to the NAA interfaced with the DAC.
- Roon Server:** Roon Server is a music management and playback solution. It can play music through audio streaming and provides rich music library browsing, search and recommendation functions. You can use it via the Roon App.
- Spotify Connect:** To use the functions of Spotify Connect, you need to install or open the Spotify App.
- ReadyMedia:** ReadyMedia (formerly known as MiniDLNA) is a DLNA server for VitOS devices with installed data disks. With ReadyMedia installed on this VitOS device, you can use DLNA-compatible devices or software to browse and play music on the data disk.
- DLNA Renderer:** DLNA Renderer is a music playback application that is compatible with the DLNA/UPnP standard. You can control the DLNA renderer to play music from DLNA servers (such as MinimServer and ReadyMedia) through the DLNA controller.
