Planar diaphragm driver to restore authentic sound

The headset is specifically designed for various music styles, excelling in presenting the delicacy of female vocals, the profundity of classical music, and the vitality of pop music, allowing you to fully appreciate the infinite charm of music.

Innovative sapphire vibration circuit with excellent acoustic performance

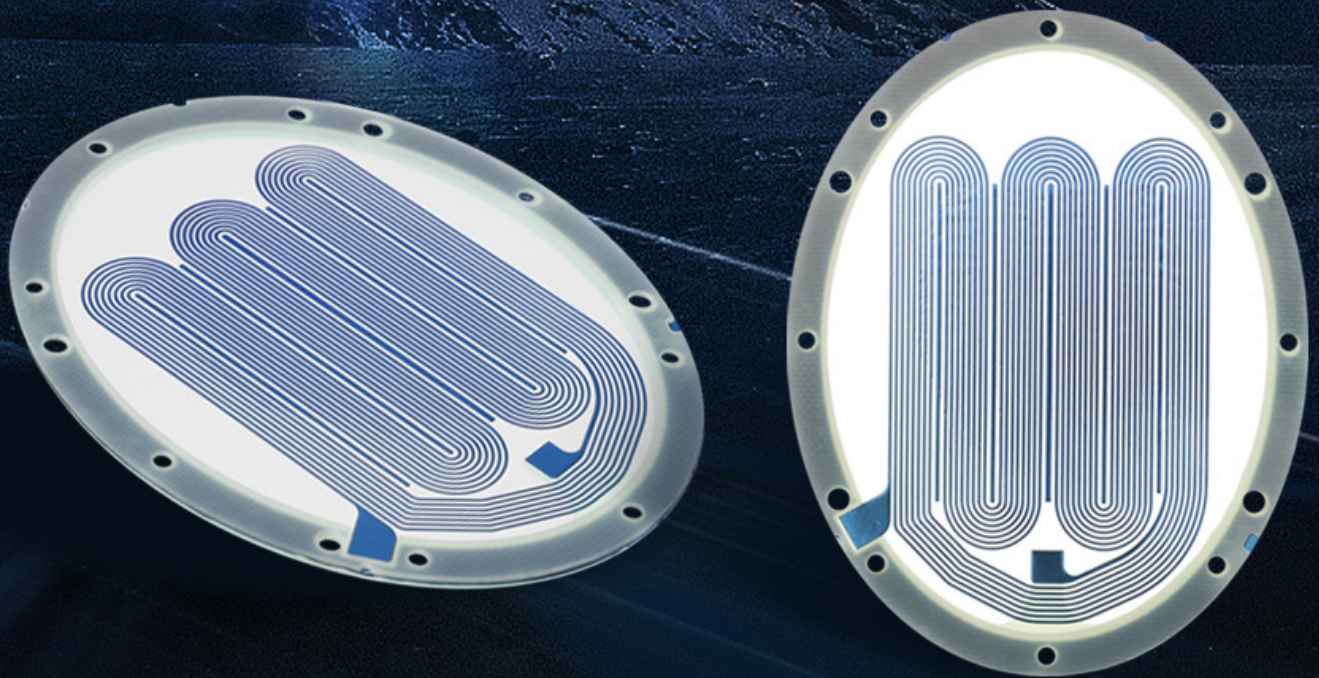

The P2 PRO features a sapphire vibration circuit prepared using a deep ultraviolet lithography mechanism with a semiconductor 28nm process, which is a first in the industry.

It perfectly combines sapphire with metal inlay, giving the planar diaphragm headphone outstanding acoustics.

To achieve superior acoustic performance, our engineers conducted over 3,000 experiments solely on the core technology of sapphire conductivity, generating vast experimental data.

They successively employed plasma glow discharge technology, ion bombardment technology, ultra-low temperature deposition technology, and PLASM cleaning technology to treat the diaphragm in multiple ways. Eventually, they met the perfect technological requirements. The diaphragm process makes the sound cleaner and more consistent.

Clear and bright sound

Bass-Solid and robust
Mid-Natural and soft
Treble-Delicate and clear

Unique and ingenious, meticulously crafted

We uphold traditional handicrafts, using fine red oak wood and hand-polishing for an elegant texture.

Each step is carefully crafted, resulting in unique and precious pieces. Limited batches due to complexity and scarcity make them all the more valuable.

Exquisite and high-end craftsmanship

CNC precision engraved metal parts undergo a unique surface gunmetal oxidation treatment, showing excellent metal texture and high-end quality.

Unique and innovative design

The ear cups are cleverly inlaid with etched stainless steel mesh, and its unique and innovative design demonstrates extraordinary artistic taste.

Comfortable to wear

P2 PRO

Wear without restraint

The headband adopts ergonomic design to ensure it fits the curve of the head. The ear pads and straps are made of soft, skin-friendly velvet material, giving you a gentle and delicate touch.

P2 PRO

Soft & Comfortable

We analyzed various face shapes and created a unique tilting ear cup design. It ensures excellent ear sealing, enhances comfort for long-term wear, and delivers superior sound quality.

The ear pads are made of high-protein leather, with lightweight and soft inert sponge inside for a perfect fit. The face-hugging part is made of skin-friendly velvet for added comfort and a silky experience.

Flexible & Adjustable

The headband steel sheet of the P2 PRO adopts an integrated design, and goes through complex and precise processing to demonstrate excellent craftsmanship;

The headband cover is made of high-end kidskin, which feels soft and comfortable, and perfectly fits various head shapes, providing an excellent wearing experience.

180° Swiveling Ear Cups Adjustable Headband

The ear cups can be swiveled 180° in all directions, and the headband can be adjusted up and down as you wish, easily adapting to various face shapes to create a unique wearing experience.

Changeable Cable Design

It meets Hi-fi audiophile demand
for upgrading cable.

The headphone is paired with imported 6N OCC cable to ensure the purity and stability of audio transmission, making the sound performance brighter and more transparent, bringing you the ultimate listening enjoyment.
